

HARD WATER SURFACE PROTECTION

- EnduroShield is an invisible, non-stick coating that reduces cleaning time by up to 90%. Untreated glass is porous and as a result absorbs mineral deposits and soap scum, making it more and more difficult to clean overtime. Shower glass is subject to mineral deposits from water, shampoo, soaps, body fats, and harsh scrubbing using toxic cleaners, causing the glass to discolor and develop irremovable staining. EnduroShield is an ultra-thin transparent glass coating that completely adheres to the surface and provides protection that will repel both water and oil based stains. The manufacturer warrants that the Enduroshield will remain water repellent to an easy-clean level, on clean glass for a period of 10 years from the date of the receipt provided by us.

SURFACE PROTECTION

- Cardinal 10 Surface Protection is an easy-clean treatment that repels both water and oil-based substances. The treatment has an ultra-long lasting bond to the glass that can only be removed by abrasion or products that would physically damage the glass. Cardinal 10 is resistant to UV degradation, temperature shock, and mineral etching due to having hard water. The manufacturer warrants that the Cardinal 10 Surface Protection will remain water repellent to an easy-clean level, on clean glass for a period of 10 years from the date of the receipt provided by us.

- ShowerGuard permanently seals the surface of the glass for lasting beauty with less maintenance. Using patented ion-beam technology, an invisible protective coating is fused to the surface, filling the peaks and valleys that occur naturally in glass and creating a smooth surface highly resilient to the dirt, soap and hard water buildup that dulls and etches ordinary glass. Unlike spray-on products, the protection of ShowerGuard never breaks down, never needs to be reapplied. This also comes with a limited-lifetime warranty!
